

Ten years building software in the Title & Real Estate industry — from product development and special projects to technical leadership and cloud migration. I turn bloated legacy systems into elegant, performant, extensible tools, and I ship products end-to-end, design through deploy. Ardent technologist determined to make a dent in the Exascale Era.

EXPERIENCE

Business Analyst III · United Wholesale Mortgage

Pontiac, MI · Nov 2024 – Present

- Drove a 15% lift in workflow efficiency by analyzing mortgage-loan data and automating report generation in SQL.
- Gathered and documented requirements with stakeholders to ship a workflow system that raised user engagement 25%.
- Aligned scalable architecture for an enterprise AI chatbot integration using Python + SQL across loan-servicing workflows.

Consultant · Neteffects, Inc.

Remote · Nov 2022 – Jan 2024

- Deprecated a legacy data-orchestration tool, coordinating across internal teams to preserve data integrity.
- Validated gRPC message flows with Postman — halved response time and raised system throughput 200% for genome-advancement decisions.

Senior IT Business Analyst · Rocket Companies — Amrock

Detroit, MI · Jan 2020 – Aug 2022

- Principal analyst migrating a loan-origination platform processing \$100B+ annually — legacy WPF → cloud-native MS-SQL + Angular.
- Built and monitored CI/CD pipelines in Azure DevOps with Kubernetes and Docker; on-call for after-hours deploys and incident response.
- Analyzed 1,000+ fields across a 100MM+ record database for a zero-sync-issue migration; shipped quality code via Cypress UI + C# integration tests.

IT Team Leader & SAFe Scrum Master · Rocket Companies — Amrock

Detroit, MI · Sep 2017 – Jan 2020

- Led a special-project team that cut appraisal turn-time 95% via encrypted video; directed an SSO + cloud-native rollout on AWS/.NET.
- Refactored auto-assignment logic (70% → 95% auto-assign) and cut support tickets 60%; ran SAFe ceremonies in Jira/Confluence.

IT Business Analyst · Rocket Companies — Amrock

Detroit, MI · May 2013 – Sep 2017

- Led UAT and process documentation for a CFPB compliance project; automated a check-refund process saving ~\$1MM and 3 months.

SELECTED PROJECT

Blueprint — field-service platform · designed & built solo

bobbice.dev

- Full operations platform — ranked Kanban, dashboards, double-entry accounting, quotes + PDFs, prospecting, and WASM Monte-Carlo forecasting — on SvelteKit / Svelte 5 + TypeScript + MongoDB, Dockerized to Azure via GitHub Actions.
- Token-driven design system with a WCAG contrast gate in CI, a native SwiftUI iOS companion, applied AI (email/receipt parsing), and 560+ automated tests. Plus a dozen interface explorations.

EDUCATION

Full Stack .NET C# · Grand Circus · 2022

C# · .NET Core · MVC · Angular · SQL

B.A., Accounting & Information Systems

Michigan State University · 2013 · 3.68 GPA

SKILLS

Languages: C#, TypeScript, Python, SQL, JavaScript

Frameworks: .NET / ASP.NET, Angular, React, SvelteKit / Svelte 5, Entity, SwiftUI

Platform: Azure DevOps, Docker, Kubernetes, CI/CD, GitHub Actions, SSO

Practice: Business analysis, SAFe Agile / Scrum, test automation, data migration, design systems
